

# Clinton Alternative Energy Committee

## Mission Statement

- Reduce the cost of energy used by the town;
- Evaluate and implement, when practical, programs, grants, collaborations and technologies to reduce energy consumption by municipal facilities;
- Help set realistic and achievable energy and cost saving goals for all departments, structures and apparatus in the municipal government;
- Educate Clinton residents to the benefits of energy conservation through leading by example. This includes engaging students and increasing awareness of energy-related issues in the Clinton Public School System;
- Insure that energy conservation becomes a key part of future town equipment procurements and infrastructure developments;
- Require that energy conservation practices become a permanent part of the town's planning and budgeting processes.
